1. Executive Summary: The Community Health Needs Assessment Process

Goals

Gordon Hospital in Calhoun, Georgia conducted a Community Health Needs Assessment in 2016.

The goals of the assessment were to:

- Engage public health and community stakeholders including low-income, minority and other underserved populations
- Assess and understand the community's health issues and needs
- Understand the health behaviors, risk factors and social determinants that impact health
- Identify community resources and collaborate with community partners
- Publish this Community Health Needs Assessment
- Use Assessment findings to develop and implement a 2016-2019 Community Health Plan (implementation strategy) based on the Hospital's prioritized issues

Methods for Engaging the Community in the Assessment

The 2016 Community Health Needs Assessment was built on input from people representing the broad community, as well as low-income, minority and other medically underserved populations.

This input was solicited throughout 2016, and was gathered and considered in multiple ways:

1. The hospital formed a Community Health Needs Assessment Committee (CHNAC) that included representatives of the hospital and community (*see Section 5*) with a special focus on underserved populations within the hospital community/service area. Those members of the Committee who serve members of minority, low-income and other medically underserved populations are indicated in the listing. The Committee's role was to guide the Assessment process and select the priority issues for the hospital's community. Specific Committee functions include:
 - a. Review of all primary and secondary data
 - b. Prioritization of key issues identified in the Assessment
 - c. Selection of Priority Issues to be addressed by the hospital
 - d. Assistance with the development of a Community Asset Inventory (*see Section 9*)
 - e. Community stakeholder interviews
 - f. Development of the Community Health Plan (implementation strategies) to address the Priority Issues identified in the Assessment.
2. 351 community surveys conducted at drug stores, community events, the health department, and health fairs. The surveys represent the ethnic and income levels of the community (*see Appendix D*)
3. Public Health input and expertise
 - a. Membership on the CHNAC
 - b. Reliance on Public Health input and expertise throughout the Assessment process (*see Section 6*)
 - c. Use of Public Health data (*see Section 7*)

Community Health Needs Assessment Committee (CHNAC)

In order to assure broad community input, Gordon Hospital created a Community Health Needs Assessment Committee (CHNAC) to help guide the hospital through the Assessment process. The Community Health Needs Assessment Committee included representation not only from the hospital, public health and the broad community, but from low-income, minority and other underserved populations.

The CHNAC met several times in 2016. As noted above, the members reviewed the primary and secondary data, helped define the Priority Issues to be addressed by the hospital, and helped develop the Community Health Plan (implementation strategies) to address the Priority Issues. (See *Section 5 for a list of CHNAC members.*)

Data

Gordon Hospital collected both primary and secondary data. The primary data included stakeholder interviews, community surveys, and internal hospital utilization data (inpatient and emergency department). This utilization data showed the top reasons for visits to Gordon Hospital over the past year.

Much of the secondary data report was compiled by Community Commons/chna.org. Overall, secondary data sources included publicly available from state and nationally recognized data sources. See *Section 8 for a list of data sources.*

Asset Inventory

The next step was a Community Asset Inventory. This Inventory was designed to help Gordon Hospital and the Community Health Needs Assessment Committee (1) understand existing community efforts to address these particular issues and (2) prevent duplication of efforts as appropriate. See *Section 12 and/or Appendix 3 for the Asset Inventory.*

Selection Criteria

Using the data findings and the Community Asset Inventory, the Community Health Needs Assessment Committee narrowed the list of 8-12 issues to 4 Priority Health and Health Behavior/Risk Factor Issues (determinants of health). Next, the Community Health Committee used a Decision Tree tool that uses clearly defined criteria to select the top Health and Health Behavior/Risk Factor Issues. See *Section 10 for the Decision Tree.*

The Decision Tree criteria included:

- A. How **acute** is the need? (based on data and community concern)
- B. What is the **trend**? Is the need getting worse?
- C. Does the hospital **provide services** that relate to the priority?
- D. Is someone else – or multiple groups – in the community **already working** on this issue?
- E. If the hospital were to address this issue, are there opportunities to **work with community partners**?

Priority Issues

The top 10 issues that emerged from the primary and secondary data were:

1. Cancer
2. High Blood Pressure/Cholesterol
3. Diabetes
4. Heart Diseases
5. Mental Health
6. Teen Pregnancy Rates/Low Birth-Weight Babies
7. Respiratory Disease – Adults
8. Asthma – Children
9. Immunizations – Children
10. Immunizations – Adults

Using the Selection criteria noted above, the Community Health Needs Assessment Committee selected **three top priorities that Gordon Hospital will address:**

- 1. Cancer**
- 2. High Blood Pressure/Cholesterol & Heart Disease**
- 3. Diabetes**

(See Sections 10 and 11 for an explanation of the issues chosen and not chosen – and the reasons why or why not.)

Approvals

The Community Health Needs Assessment findings and selected Priority Issues were approved by the Gordon Hospital Board on August 17, 2016. The final Needs Assessment was posted on the hospital's web site prior to December 31, 2016.

Next Steps

Next, the Community Health Needs Assessment Committee will work with Gordon Hospital to develop a measurable 2017-2019 Community Health Plan (implementation strategy) to address the priority issues. The Plan will be completed and posted on the hospital's web site prior to May 15, 2017.

2. Hospital Description

Gordon Hospital is part of Adventist Health System (AHS), which has 44 hospitals in 10 states. AHS is a national leader in quality, safety and patient satisfaction. Although separated in geography, our facilities are united by the common values of Christian mission, community wellness, quality and service excellence, high ethical standards, compassion and cultural diversity. Our facilities practice the tradition of whole-person care in all that we do.

Operating as a 69-bed acute care facility, Gordon Hospital offers multiple services for the residents of North Georgia. These include: 24-hour Emergency Center, Rehabilitation Services, Intensive and Progressive Care Units, Radiology, Women’s Diagnostic Center, General and Cancer Surgery, Home Health Services, Oncology Services and Radiation Therapy, Urgent Care Centers, Urology Services, Endocrinology Services, Pain Management Services, and Pastoral Care.

In addition, Gordon Hospital operates the following satellite facilities: Gordon Urgent Care Calhoun, North Georgia Eye Care, Gordon Oncology, Gordon Urology, Northwest Georgia Orthopedics and Sports Medicine (2 locations), Gordon Home Care, Northwest Georgia OB/GYN, Gordon Primary Care, Northwest Georgia Endocrinology, Gordon Adult & Pediatric Medical Associates, Gordon Hospital Internal and Family Medicine, Gordon Hospital OWASA Family Medicine, Gordon Neurology, North Georgia Cancer Center, and Gordon Health Depot, Cook Family Practice, and Michael A. Witt, MD, offices in Chatsworth, Georgia.

During 2015, Gordon Hospital treated ___ inpatients, saw 33,168 Emergency patients, performed 5,765 surgeries, delivered 567 babies, cared for 33,186 outpatients, and saw 156,545 patients in its physician clinics (Attachment 1).

3. Choosing the Community

Gordon Hospital defined its “community” as its Primary Service Area (PSA) from which 75-80% of its patients come.

4. Community Description & Demographics

Gordon Hospital's Primary Service Area includes all zip codes located within Gordon County. The zip codes included in our survey and results were:

- 30701 – Calhoun
- 30703 – Calhoun Post Office Boxes
- 30139 – Fairmount
- 30732 – Oakman
- 30733 – Plainville
- 30734 – Ranger
- 30735 – Resaca
- 30746 – Sugar Valley

Gordon County is strategically located on I-75 in northwest Georgia, 45 minutes from both Atlanta and Chattanooga, TN. This enviable location has attracted and continues to attract commercial and industrial enterprises such as major carpet and floor covering manufacturers, food processors, heavy machinery assembly companies, and distribution firms. Gordon County and the surrounding area offer a vast array of quality-of-life resources including civil war historic sites, state parks, quality health care, excellent public and higher educational opportunities, a cultural arts center, and regional outlet mall.

The population of Gordon County is estimated to be 56,574. Gordon County's economic community is comprised of 43.2% Goods Producing services, which includes industry, manufacturing, Service Producing Industries such as retail and healthcare comprise 44.2% of our economy, with 12.6% of jobs being found in government. The majority of these jobs are found in the private sector. In 2014, Gordon County had a per capita income of \$30,872. The unemployment rate dropped to 5.7% in 2015. This number represents a decline from 11.5% during 2011 (Attachment 2).

The majority of our community ranges in age from 18 to 64 with it being equally distributed between men and women. The predominant ethnicity is white (78.9%) followed by the Hispanic and Latino community (14.6%) and black residents comprising 4.4%.

Academically, the county boast both city and county school systems as well as two college and career academies that are administered through Gordon County Schools and the Calhoun City Schools, respectively. Nearly 74% of students graduate from high school and 11.7% hold a Bachelor degree or higher.

(See Appendix 2 for a full demographic and population description.)

5. Community Health Needs Assessment Committee (CHNAC)

A Community Health Needs Assessment Committee was formed to help Gordon Hospital conduct a comprehensive assessment of the community. The Committee included representation from the board community, public health, and low-income, minority and other underserved populations. The Committee met regularly throughout 2016.

2016 Community Health Needs Assessment Committee

Name	Entity/Agency Represented	Title	The Stakeholder represents:				Street Address	Phone & Email
			Minority	Low-income	Public Health	Other Medically Under-served		
Lisa Crowder	Gordon County Health Department – public health services	Nurse Manager	x	x	x	x	310 North River Street Calhoun, GA 30701	706-624-1444 lisa.crowder@dph.ga.gov

6. Public Health

Lisa Crowder, RN, the Nurse Manager of the Gordon County Health Department and Catoosa County Health Department is a member of the Community Health Needs Assessment Committee. Ms. Crowder has been with the Gordon County Health Department since 2000. In this role, she leads multiple community initiatives that serve low-income families in Gordon County. Prior to working at the Gordon County Health Department, Ms. Crowder was employed by Floyd Medical Center as a Rehabilitation Nurse.

7. Primary & Secondary Data Sources

Primary, Secondary and Hospital Utilization data were used in this Needs Assessment.

Primary Data

- a. Community Health Needs Assessment Committee
- b. Stakeholder interviews
- c. Community surveys – paper survey questionnaires collected at health fairs, health screenings, and blood pressure clinics set up at the local Wal-Mart as well as online surveys distributed through email (*see Appendix 4 for the Survey findings*)
- d. Hospital Utilization Data – top 10 Inpatient and Emergency Department diagnoses

Secondary Data

- a. Cardiac Arrest Registry to Enhance Survival (CARES), 2011-2012
- b. Centers for Disease Control & Prevention (CDC), Behavioral Risk Factor Surveillance System (BRFSS)
- c. Centers for Disease Control & Prevention (CDC), National Center for Chronic Disease Prevention & Health Promotion, 2012
- d. Centers for Disease Control & Prevention (CDC), National Vital Statistics System
- e. Centers for Disease Control (CDC), Wide-Ranging Online Data for Epidemiologic Research, 2006-2010
- f. Dartmouth Atlas of Health Care, Clinical Practice, 2012
- g. Dartmouth College Institute for Health Policy
- h. Federal Bureau of Investigation (FBI), FBI Uniform Crime Reports with additional analysis by the National Archive of Criminal Justice Data
- i. Healthy People 2020
- j. National Institutes of Health (NIH); National Cancer Institute (NCI); Surveillance, Epidemiology and End Results Program; State Cancer Profiles; 2007-2011
- k. University of Wisconsin Population Health Institute, County Health Rankings, 2015
- l. US Census Bureau, American Community Survey (ACS), 2009-2013
- m. US Census Bureau, Small Area Health Insurance Estimates, 2013

- n. US Dept. of Agriculture (USDA), Economic Research Service, USDA Food Access Research Atlas, 2010
- o. US Dept. of Health & Human Services (HHS), Center for Medicare & Medicaid Services (CMS), Provider of Services File, Sept. 2015
- p. US Dept. of Health & Human Services (HHS), Health Indicators Warehouse
- q. US Dept. of Health & Human Services (HHS), Health Resources & Services Administration (HRSA), Area Health Resource File, 2013
- r. US Dept. of Labor (DOL), Bureau of Labor Statistics, Sept. 2015
- s. Georgia Area Labor Profile for Gordon County, May 2016

8. Asset Inventory

Gordon Hospital’s asset inventory was designed to determine current community health programs in the county. The inventory includes both community and hospital programs for several of the areas of focus. By addressing some of the focus areas with current programming, we can expand the programming and make a greater difference in the health of our community.

Those assets include a partnership with the American Cancer Society, a partnership with area hospitals and NW GA Cancer Coalition, trained medial staff, a cancer committee, Harris Radiation Therapy Center, advertising, American Diabetes Association outreach and educational materials, health department diabetes education program, screenings, Teen Health Task Force, Boys and Girls Club, Family Intervention Specialists, Hospital Foundation, educational seminars, Drugs Don’t Work Program, Red Ribbon Week, Drug Take Back Program, local recreation departments, Breath Free program, Farmers’ Market, Creation Health Program, and financially supporting community programs and education. *Appendix 3 includes the full Asset Inventory.*

9. Data Summary & Priority Selection

After the primary and secondary data was aggregated together, the Community Health Needs Assessment Committee looked at the results as a whole and determine which of the priorities Gordon Hospital should address based on need and available assets.

10. Primary & Secondary Data – high-level findings

Primary Data: top 8-10 health priorities identified in Community Interviews <i>(including the hospital Community Health Needs Assessment Committee)</i>			
1	Cancer	6	Teen Pregnancy
2	Heart Disease	7	High Blood Pressure
3	Obesity	8	Diabetes
4	Mental Health		
5	Drug Abuse		

Primary Data: top 8-10 health priorities identified in Community Surveys			
1	Cancer	6	Teen Pregnancy Rates/Low Birth Weight
2	High Blood Pressure/Cholesterol	7	Respiratory Disease – Adults
3	Diabetes	8	Asthma – Children
4	Heart Disease	9	Immunizations – Children
5	Mental Health	10	Immunizations - Adults

Primary Data: top 8-10 health priorities determined by Hospital Utilization data (ER & Inpatient)			
1	Maternal, Infant and Child Health	6	Gastro Disorders
2	Heart Disease	7	Substance Abuse
3	Respiratory Disease	8	Cellulitis
4	Urology Issues		
5	Nutrition		

Secondary Data: top 8-10 health priorities identified in the County Health Department’s needs assessment			
1	Women’s Health	6	Injury and Violence Prevention
2	Cancer	7	Obesity
3	Maternal, Infant, and Child Health	8	Safe Sex
4	Immunization and Infectious Disease	9	
5	Substance Abuse	10	

11. Aggregated Priority Issues (based on data sets in Section 9.A.)

While the data sources showed that the following health conditions were prevalent in all ethnic groups in the Gordon Hospital community, national data shows that diabetes and heart disease rates are often higher in African American and Hispanic populations.

	Priority Issue	Ethnic Group	Age Group
1	Cancer	All	Adults 40+
2	High Blood Pressure/Cholesterol	All	Adults 18+
3	Diabetes	All	
4	Heart Disease	All	Adults 18+
5	Mental Health	All	
6	Teen Pregnancy Rates	All	
7	Respiratory Disease – Adults	All	
8	Asthma – Children	All	
9	Immunizations – Children	All	
10	Immunizations – Adults	All	

12. Priority Selection using the CHNAC Decision Tree

A. The Community Health Needs Assessment Committee reviewed the top 10 conditions identified in Section 11 (above). They then used specific criteria and a Decision Tree to determine the top needs of the community served by Gordon Hospital. The criteria included:

1. How **acute** is the need? (based on data and community concern)
2. What is the **trend**? Is the need getting worse?
3. Does the hospital **provide services** that relate to the priority?
4. Is someone else – or multiple groups – in the community **already working** on this issue?
5. If the hospital were to address this issue, are there opportunities to **work with community partners**?

CHNA Decision Tree

13. Priority Issues that the Hospital Will Address

Priority Issue	Decision Tree Rationale							
	Magnitude # or % of people impacted	Disparity Is one group of people affected more than another? If so, whom?	Acuity High, Medium or Low	Trend Is the Issue getting worse?	Hospital Services Does the hospital have the capacity to impact?	Duplication Is someone else leading out on the Issue?	Collaboration Is there opportunity to work with others?	
Cancer	81.54%	No	High	Yes	Yes	Yes	Yes	
High Blood Pressure/Cholesterol	60.92%	No	High	Yes	Yes	No	Yes	
Diabetes	55.08%	No	High	Yes	Yes	Yes	Yes	
Heart Disease	48.62%	No	High	Yes	Yes	Yes	Yes	

Based on the Decision Tree Rationale, Gordon Hospital will address the following Priority Issues:

- A. **Cancer** – Number one health problem/condition in our community. We believe we are in a position to help our community with cancer due to the upcoming women’s imaging center and our continued work at the Harris Radiation Center.
- B. **High Blood Pressure/Cholesterol & Heart Disease** – Also ranked high in our community survey. We can continue to offer risk assessments and screenings but on a larger scale.
- C. **Diabetes** – Several of the behavior/risk factors indicated on our community survey are directly related factors of diabetes; therefore, the Committee chose diabetes as one of our key issues.

14. Community Issues that the Hospital Did Not Choose

Priority Issue	Decision Tree Rationale						
	Magnitude # or % of people impacted	Disparity Is one group of people affected more than another? If so, whom?	Acuity High, Medium or Low	Trend Is the Issue getting worse?	Hospital Services Does the hospital have the capacity to impact?	Duplication Is someone else leading out on the Issue?	Collaboration Is there opportunity to work with others?
Mental Health	14.46%	No	Medium	Yes	No	No	No
Immunizations	2.77%	No	Low	No	Yes	Yes	Yes
Asthma – Children	4.0%	No	Low	No	Yes	Yes	No
Teen Pregnancy	11.38%	No	Medium	Yes	No	Yes	No

Based on the Decision Tree Rationale, Gordon Hospital will not address the following issues:

- D. Mental Health – Gordon Hospital does not offer mental health services.
- E. Immunizations (Adults & Children) – More education could be accomplished through community programming and support of the local health department.
- F. Asthma in children – Although some community members cited childhood asthma as a community health problem, the CHNA committee did not believe it was a priority compared to the other issues.
- G. Teen Pregnancy Rates – There are teen pregnancy programs in place through the Boys and Girls Club, the Teen Health Task Force, and Family Intervention Specialists.

15. Next Steps

The Community Health Needs Assessment Committee will develop measurable plans and goals to address these health needs. Gordon Hospital will work to maximize the partnerships and collaboration available through various agencies and groups within Gordon County to aggressively impact the health of our community. We will also continually evaluate our programs to make sure our goals of reducing the incidence of cancer, reducing the incidence of heart disease/high blood pressure/cholesterol issues, and reducing the incidence of diabetes are being achieved.

16. Written Comments from the 2013 Community

The hospital did not receive any written comments from the public regarding our 2013 Community Health Needs Assessment or Community Health Plan.

17. Review of the Strategies Undertaken in the 2013 Community Health Plan

The Hospital conducts an annual Evaluation of the progress made on its Community Health Plan (Implementation Strategies). The Evaluation is reported to the IRS in the hospital's Form 990. The following narrative is a copy of the 2015 Community Health Plan Evaluation as noted in Form 990, Schedule H, Part V, Section B, Line 11.

Gordon Hospital is located in Calhoun, Georgia. Because the community is very small (16,000 people), special events, seminars and screenings continue to be effective tools to reach the community. In most cases, participation in hospital-sponsored events was at least double the original goal.

Priority: Cancer

2013 Description of the Issue: Cancer (including all types) ranked number 1 in our community survey in Gordon County. The State of Georgia's age adjusted cancer deaths/100,000 is 181.8 vs. the U.S. National average at 178.4. The Healthy People 2020 goal is 160.6. Although the latest CDC showed that Gordon County's cancer rates have stabilized, they are not meeting the HP2020 goals. Therefore, the Community Health Needs Assessment Committee (comprised of community members including those representing low-income, minority and other underserved populations) believed Cancer to be a high priority for our community.

2015 Update: Because cancer was identified as a top need, Gordon Hospital held free events and screenings related to breast cancer, melanoma, prostate, oral/head/neck cancers, and smoking cessation; 120 people were screened (the goal was 75). The hospital reached 525 people (the goal was 75) at cancer education programs that included underserved populations, many of whom receive free cancer treatment at the hospital's new Harris Radiation Therapy Center. 111 low-cost mammograms were offered in cooperation with the Health Department (the goal was 75).

Priority: Access to Health Care

2013 Description of the Issue: Another priority identified by community feedback is the lack of affordable health care available in zip code 30139, which is the community of Fairmount in Gordon County. Recently, a privately owned clinic shut its doors for financial reasons and the community was left with no medical coverage. This area is composed largely of seniors who have little to no public transportation, and most physicians are located 25-30 minutes away. The Needs Assessment committee saw a need to bring health care access to that area of our county.

2015 Update: Gordon Hospital opened a primary care clinic in Fairmount; it had over 2,400 patient visits in 2015. In addition, the hospital accepts referrals from free and sliding fee scale clinics operated by the Health Department; the clinics are 14-19 miles from Fairmount.

Priority: Heart Disease and Stroke

2013 Description of the Issue: The hospital's Needs Assessment committee also chose heart disease and stroke as priority issues. Cardiovascular disease is the number one killer in the state of Georgia. For Georgia, the age-adjusted death rate per 100,000 is 49.7. It is 42.2 nationally, and the Healthy People 2020 goal is 33.8. This ranked very high in our survey data, as well as within our local industry sector (manufacturing, heavy and light industry, and flooring plants). Employee Health

nurses at the various plants were more concerned with employees having heart attacks than with getting hurt on the job. By choosing this priority and focusing on healthy eating, we hope to reduce the incidence of obesity and diabetes for our county as well.

2015 Update: Gordon Hospital held a number of community outreach and education efforts, including 1,250 free monthly blood pressure screenings (the goal was 400) throughout the community at locations such as Walmart. Patients were referred to their family physicians or a Health Department clinic. The hospital's three CREATION Health educational programs (based on the tenants of choice, rest, environment, activity, trust, interpersonal relationships, outlook and nutrition) had 75 graduates. Our weekly CREATION Health Farmers Market averaged 25 vendors and 150 attendees per week during the months of June, July and August.

Gordon Hospital had planned to educate 200 fifth-graders in Gordon County on healthy eating, the need for physical activity, and the dangers of tobacco. We changed the format to a health-focused Back-to-School-Blast at which we saw 500 elementary school students (plus their parents), including many from low-income families.

Priority: Respiratory Disease and Smoking

2013 Description of the issue: The final priority that the Needs Assessment committee chose is respiratory disease and smoking. From our interviews, we have seen an increase in teen smoking, which in turns leads to higher incidences of respiratory diseases. This priority emerged in both our community survey as well as our internal data. According to the Centers for Disease Control and Prevention, Georgia's percentage of smokers is 17.6%. The Healthy People goal is 12%. The committee believed these two items were intertwined and could be addressed together.

2015 Update: The focus of the Breathe Free tobacco cessation program (offered at no cost) has moved from one of graduation to participation. This allows attendees to be exposed to options for tobacco cessation and help them determine their readiness to quit. In 2015, Gordon Hospital held 18 Breathe Free classes with 118 attendees. The hospital also held lung disease/COPD seminars targeted at low-income populations in Gordon County; 1,175 people participated (the goal was 75).

Priorities Considered but Not Selected

Substance Abuse (drugs) ranked high in our community surveys. The hospital supports existing community programs including the Drugs Don't Work Program, Red Ribbon Week, Family Intervention Specialists, and Drug Take Back Program. We do not offer drug rehabilitation services but can help community partners work upstream to prevent or decrease addictions.

Maternal, Infant and Child Health and unprotected sexual activity ranked high in our survey. Community programs are offered through the Boys and Girls Club, the Teen Health Task Force, and Family Intervention Specialists. The hospital works with the Healthy Families program after a child is born. This issue of unprotected sexual activity is not within the hospital's areas of expertise; the Health Department handles this issue.

Note: *Denotes confidential data relating to individual employers and cannot be released. These data use the North American Industrial Classification System (NAICS) categories. Average weekly wage is derived by dividing gross payroll dollars paid to all employees - both hourly and salaried - by the average number of employees who had earnings; average earnings are then divided by the number of weeks in a reporting period to obtain weekly figures. Figures in other columns may not sum accurately due to rounding. All figures are 4th Quarter of 2015.
