1. Executive Summary: The Community Health Needs Assessment Process

Florida Hospital Fish Memorial (the Hospital) is one of five Florida Hospital facilities in Volusia County, Florida. Florida Hospital's Volusia County facilities include Florida Hospitals DeLand, Fish Memorial, Memorial Medical Center, Oceanside and New Smyrna (formerly Bert Fish Hospital).

Florida Hospital (five facilities) in Volusia County is part of the 2016 Volusia County Community Health Needs Assessment Partnership. Other Partnership members include the Florida Department of Health-Volusia, Halifax Health (a government hospital), and One Voice for Volusia (community nonprofit). All Partnership members including the five Florida Hospitals define Volusia County as their primary service area.

In 2016, the Partnership conducted a Volusia County Community Health Needs Assessment. For Florida Hospital, this Assessment is considered to be a joint, **regional Community Health Needs Assessment** for the five Florida Hospital facilities in Volusia County.

Florida Hospital then used the regional Needs Assessment to develop facility-specific Community Health Needs Assessment documents for each facility. This document is the facility-specific assessment for Florida Hospital Fish Memorial.

The reader will note that this Fish Memorial document aligns with the regional Community Health Needs Assessment. It also discusses the immediate community around Florida Hospital Fish Memorial in order to demonstrate an understanding of the specific Fish Memorial community.

The regional 2016 Community Health Needs Assessment is also posted on this web page.

Goals

The goals of the regional 2016 Volusia County Community Health Needs Assessment were to:

- Engage public health and community stakeholders including low-income, minority and other underserved populations;
- Assess and understand the community's health issues and needs;
- Understand the health behaviors, risk factors and social determinants that impact health;
- Identify community resources and collaborate with community partners;
- Publish this Community Health Needs Assessment; and
- Use Assessment findings to develop and implement a 2016-2019 countywide Community Health Plan (Implementation Strategies) based on the community's prioritized issues. (The countywide Community Health Plan will describe how each collaborating partner plans to address or not address each significant health need identified in the joint Community Health Needs Assessment and will include the strategies in each partners' individual Community Health Plan (CHP), including Florida Hospital Fish Memorial).

Methods for Engaging the Community in the Assessment

In order to assure broad community input, Florida Hospital and the Volusia County Community Health Needs Assessment Partnership created a multi-tiered approach to stakeholder involvement. Specifically:

1. The plan included the formation of a **Leadership Team** that included 45 leaders from 15 organizations representing key sectors of the public health system as well as low-income, minority and other underserved populations. The Leadership Team was tasked with guiding the Partnership through the Assessment process. The Leadership Team met three times in 2015 and 2016 to

review primary and secondary data, help define the Priority Issues to be addressed in the countywide Community Health Plan, and help develop the Community Health Plans (implementation strategies) for each collaborating hospital facility to address. The assessment process and selection of the priority issues for the Hospital's community was conducted by the Leadership Team. Specific Leadership Team functions included:

- Review of all primary and secondary data
 - Prioritization of key issues identified in the Assessment
 - Selection of Priority Issues to be addressed by the hospital
 - Assistance with the development of a Community Asset Inventory (see Section 9)
 - Participation in community stakeholder surveys
 - Development of the Community Health Plan (implementation strategies) to address the Priority Issues identified in the Assessment.
2. In addition to the Leadership Team, the 2016 Community Health Needs Assessment process included input from people representing the broad community, as well as low-income, minority and other medically underserved populations. This input was solicited throughout 2016, and was gathered and considered in multiple ways:
- Community surveys (internet and paper) that reached 2,003 consumers and stakeholders
 - Two community meetings that engaged 120 community members and stakeholders
 - Public Health input and expertise

Data

The Volusia County CHNA Partnership's Leadership Team and the five Florida Hospital facilities in Volusia County collected both primary and secondary data. The primary data included stakeholder input at two community meetings and a community survey with 2,003 respondents. Additionally, Florida Hospital Fish Memorial considered internal hospital utilization data (inpatient and emergency department) to determine their internal priority issues.

The secondary data included public health and other publicly available data from state and nationally recognized data sources.

Much of the primary and secondary data included in this final CHNA report was compiled by One Voice for Volusia, the agency contracted by the Partnership to assist with data collection. *See Section 7 for a list of data sources.*

Asset Inventory

The next step was a Community Asset Inventory. This Inventory was designed to help the Volusia County Partnership (1) understand existing community efforts to address the identified health issues and (2) prevent duplication of efforts as appropriate. The Asset Inventory was created through a web-based Community Input Survey and a Community Meeting, hosted by One Voice for Volusia, with 120 stakeholders participating. *The Asset Inventory is found in Section 9 and Appendix B.*

Selection Criteria

Using the data findings and the Community Asset Inventory, the Volusia County Partnership's Leadership Team narrowed the initial identified health topics to 14 key health issues. Through input gathered at a meeting of 120 community members, that list was narrowed to five final Priority Health and Health Behavior/Risk Factor Issues (determinants of health).

The Volusia County Leadership Team used clearly defined criteria to select the top Health and Health Behavior/Risk Factor Issues. The criteria included:

- A. How acute is the need? (based on data and community concern)
- B. What is the trend? Is the need getting worse?
- C. Does the hospital provide services that relate to the priority?
- D. Is someone else – or multiple groups – in the community already working on this issue?
- E. If the hospital were to address this issue, are there opportunities to work with community partners?

Priority Issues

The Priority Issues selected by the Partnership were:

1. Adult Behavioral Health
2. Youth Mental Health and Behavioral Health
3. Chronic Disease: Cardiovascular and Diabetes
4. Barriers to Accessing Health Care Services
5. Healthy Eating and Physical Activity

See Section 11-12 for an explanation of the issues chosen and not chosen – and the reasons why or why not.

Approvals

The Community Health Needs Assessment findings, Report and selected Priority Issues were approved by the Florida Hospital Fish Memorial Hospital Board in Fall 2016. The Florida Hospital Fish Memorial and regional Community Health Needs Assessments were posted on the Hospital's web site prior to December 31, 2016. (The other Florida Hospital facilities in Volusia County also posted regional and facility-specific Assessments.)

Next Steps

The Volusia County Partnership (including the five Florida Hospital facilities) will work to develop a measurable 2016-2019 Community Health Plan (implementation strategy) to address the priority issues. The Plan will include Florida Hospital and the other partners. It will be completed and posted on the Hospital's web site prior to May 15, 2017.

2. Hospital Description

Florida Hospital Fish Memorial is a part of Adventist Health System, the nation's largest not-for-profit Protestant healthcare provider with a mission of extending the healing ministry of Christ. Florida Hospital Fish Memorial is a 175-bed hospital organization that is fully accredited by the Joint Commission on Accreditation of Health Care Organizations. For over 50 years, Florida Hospital Fish Memorial has served the West Volusia area and surrounding communities by providing comprehensive healthcare services.

3. Choosing the Community

Florida Hospital Fish Memorial defines its "community" for the purposes of the Community Health Needs Assessment as all of Volusia County. The Hospital's Primary Service Area (PSA) from which 75-80% of its patients come includes ZIP codes 32713, 32725, 32738 and 32763.

4. Community Description & Demographics

Florida Hospital Fish Memorial's Primary Service Area is Volusia County, with a special focus on ZIP codes 32713, 32725, 32738 and 32763.

Volusia County Profile

Stretching along 47 miles of the Atlantic Coast and west to the St. Johns River lies Volusia County, Florida. Located at the intersection of the I-4 and I-95 corridors, Volusia County is roughly the size of Rhode Island and sits about 50-miles northeast of Orlando, 60 miles north of the Kennedy Space Center, and 90 miles south of Jacksonville. Volusia County is geographically separated into east and west, and in some areas almost literally divided by wetlands. Volusia County has 16 cities--the city of Deltona, on the west, is the largest in population and Daytona Beach, on the east, ranks second, while unincorporated Volusia County makes up about one-fifth of the population.

In 2014, Volusia County's population increased over the half million mark to 507,531, growing 2.6% since 2010. Children 18 and under made up 18% of the population, while 23.2% of the population was 65 years and older.

According to the U.S. Census Bureau, the Volusia County median income was \$40,818 and 11.7% of all families were living in poverty as last reported in 2014. The poverty indicator jumps to 24.0 % for households with children 18 and under and to 46.9% for female, single head of households with children under 18.

Preliminary Volusia County unemployment statistics for December 2015 have been released by the U.S. Department of Labor, Bureau of Labor Statistics, Local Area Unemployment Statistics Program. They show the Volusia County civilian labor force at 236,801; total employment at 225,072 and total unemployment at 11,729, indicating an unemployment rate of 5.0 % (formerly at 10.8 % in 2011).

Volusia County is home to nine regionally accredited colleges and universities and two technical colleges, with over 35,000 students enrolled in a variety of degree and certificate programs. These institutions offer a diverse focus of academic programs and have been recognized by U.S. News and World Report in the 2015 Best Colleges Rankings. 88.9% of Volusia residents have a high school education or higher and 22.5% have a bachelor degree or higher. During the 2015-16 school year, total public school enrollment (PreK-12) was 62,937.

In 2014, the Volusia County population was 83.9% white, 10.5% black and 5.6% other races or multi-racial. 12.2% of the population was Hispanic.

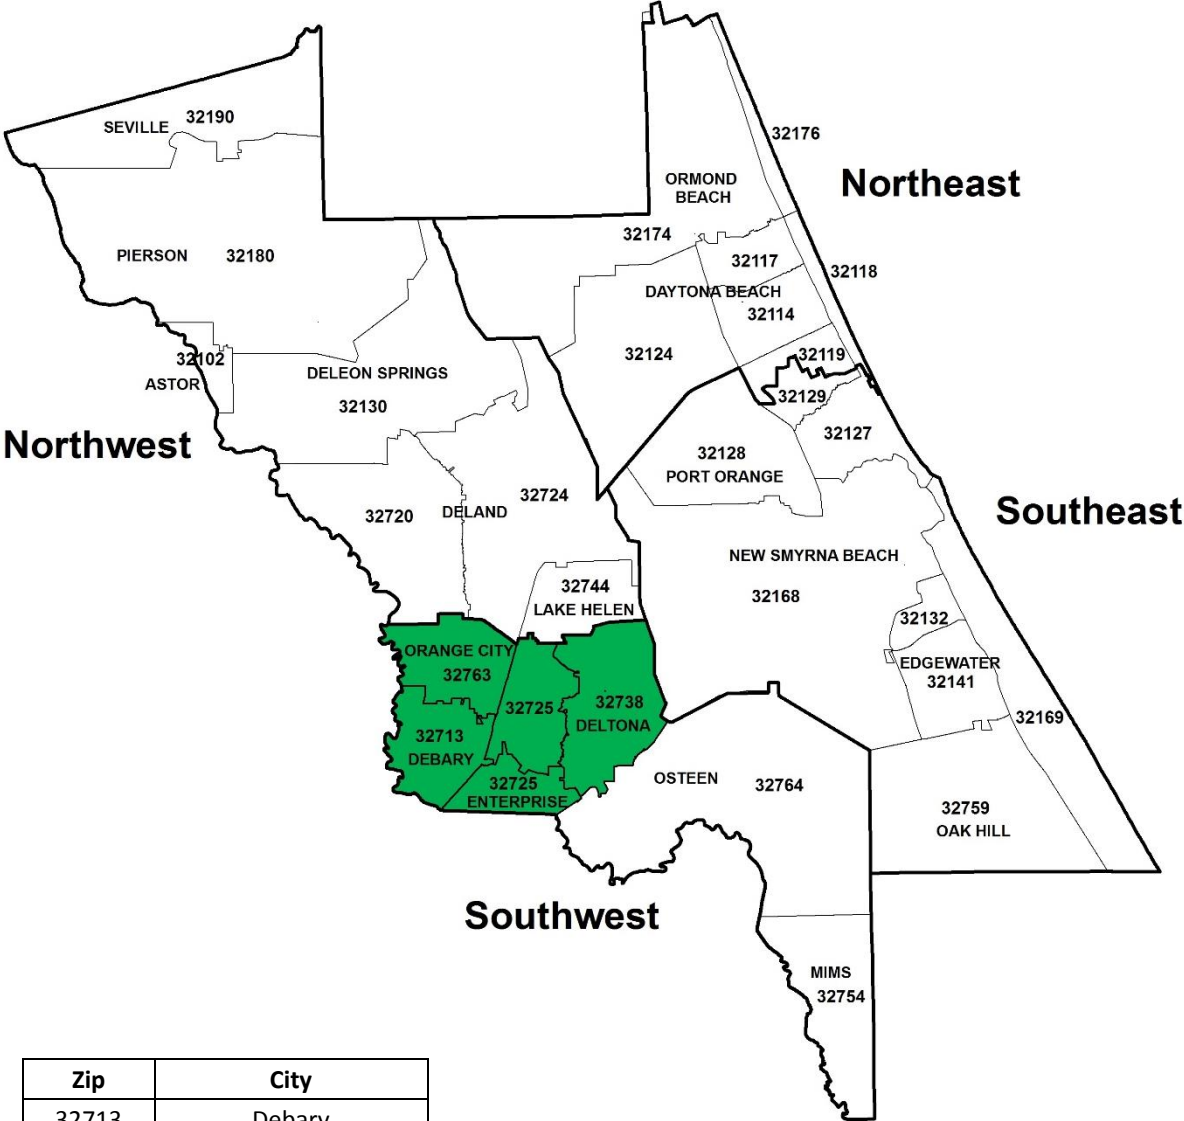

Florida Hospital Fish Memorial

As detailed in the tables on the following pages, residents in some geographic areas of the County and the PSA suffer disproportionately with respect to key socio-economic and health issues. A summary of those differences relating to the Florida Hospital Fish Memorial Primary Service Area ZIP codes is noted below:

- 32763 and 32725 had higher rates family poverty than the Volusia County
- 32763, 32725 and 32738 had higher rates of unemployment than the Volusia County
- 32738 had a higher rate of Age-adjusted Heart Failure hospitalizations than the rest of the PSA
- 32738 had a higher Coronary Heart Disease Age-adjusted death rate than the rest of the PSA
- 32763 had a higher Stroke hospitalization rate than the rest of the PSA
- 32763 had a higher Diabetes age-adjusted death rate than the rest of the PSA
- 32763 and 32713 had a higher low birth weight rate than the rest of the PSA

5. Community Health Needs Assessment Leadership Team

The Leadership Team of the Volusia County Community Health Needs Assessment Partnership was formed to conduct a comprehensive assessment of the community. The Leadership Team included representation from the community, public health, and low-income, minority and other underserved populations. The Team met three times during 2015-2016.

6. Public Health

The Florida Department of Health-Volusia was one of the 7 key partners in the 2015-16 Volusia County CHNA Partnership. They were represented by:

- Patricia Boswell, Administrator
- Loreen Husband, Community Health
- Thomas Bryant III, Office of Informatics and Assessment
- Ron Rondeau, Interim Director
- Dona DeMarsh Butler, Director of Community Assistance Volusia County

Patricia Boswell has served as the assistant county health department director in Pinellas County and prior to that she was director of clinical services and community health promotion in Pinellas County for 10 years.

A fifteen-year veteran of the Department, Patricia began her career with Florida Health in 2001 as the program manager for the Breast and Cervical Cancer Screening Program in Pinellas County. In 2004, she

became director of the Office of Chronic Disease Prevention for the Florida Department of Health in Pinellas County. Prior to her arrival at the Department, Patricia was the Executive Director for Sullivan County Victim Services in Pennsylvania from 1995 to 2000, Assistant Director of Capital Planning for Hershey Medical Center in Pennsylvania from 1993 to 1995, and a Legislative Analyst for the Suffolk County Office of Legislative Budget in New York from 1986 to 1993. Patricia started her career in public health more than 31 years ago at the Suffolk County Health Department.

Patricia holds a Master of Science in Urban and Policy Sciences from the State University of New York at Stony Brook and a Master of Public Health from the University of South Florida. She is also a graduate of the National Public Health Leadership Institute and the Public Health Leadership Institute of Florida.

Thomas Bryant III is the director of the Office of Informatics and Assessment (OIA). He came to Volusia County in 2013 with the charge to inform the Volusia County community of their health status, provide health data to facilitate healthy lifestyle choices and utilize data to assist health department programs to improve upon their processes and services.

Mr. Bryant started his public health career in 2001 at the Duval County Health Department where he co-founded the Institute for Public Health Informatics and Research. In 2008, the Institute received the National Maternal and Child Health Effective Practice Award for their community health status reports.

Mr. Bryant has directed research and evaluation programs at the Volusia and Duval County Health Departments, Northeast Florida Regional Planning Council, NYC Department of Probation and NYC Commission on Human Rights. He has taught graduate and undergraduate courses at Columbia University, New York University and Tusculum College. Mr. Bryant has extensive training and experience in qualitative and quantitative analyses. He is trained in Perinatal Periods of Risk analyses and MCH Epidemiology. He is proficient in statistical, database and GIS mapping software.

Mr. Bryant has co-authored manuscripts published in the *Journal of Public Health Management & Practice*, *Maternal and Child Health*, *Medical Care*, *Pediatrics*, *Clinical Pediatrics* and *Public Health Reports*. He has presented at national and state conferences including the American Public Health Association, Centers for Disease Control and Prevention, Society for Applied Anthropology, Florida Statewide Epidemiology Seminar, Florida Public Health Association and the Florida Medicaid Policy and Research Conference. Mr. Bryant received his Master's in Social Work from Florida State University. He continued his education in social research in the doctoral program at the Columbia University School of Social Work.

7. Primary & Secondary Data Sources

Primary Data

- a. Volusia County CHNA Leadership Team engagement
- b. Community Health Survey. The 2015-2016 Community Health Survey in Volusia and Flagler Counties relied primarily on an Internet-based survey--which was collected using Survey Monkey--to reach as many respondents as. The online survey was available in English and Spanish via www.communityhealthsurvey.com. There were 2,150 Internet surveys collected. Paper surveys, also available in Spanish and English, were utilized to reach individuals without convenient access to the Internet and were manually entered. 530 paper surveys were manually entered. *See Appendix A. for the Community Health Survey Results for Volusia County and Florida Hospital Fish Memorial's PSA.*
- c. Hospital Utilization Data (Top 10 Inpatient and Emergency Department diagnoses by payer)

Secondary Data

A comprehensive CHNA document was prepared for the Volusia County CHNA Leadership Team that included secondary data from the following sources.

8. Community Collaboration

In 2015-16, to reflect best practices and maximize community impact, leaders from Florida Hospital DeLand, Florida Hospital Fish Memorial, Florida Hospital Memorial Medical Center, Bert Fish Medical Center (now Florida Hospital New Smyrna), Florida Department of Health-Volusia, Halifax Health and One Voice for Volusia convened in a collaborative process to develop a shared Community Health Needs Assessment & Community Health Improvement Plan (CHIP) for Volusia. Florida Hospital Fish Memorial was part of that process, and may target specific needs based on the hospital's service area and capacity.

These pillar organizations unanimously agreed to work together for the greater good and formed the **Volusia County Community Health Needs Assessment (CHNA) Partnership** by committing their time, talent and resources to support the CHNA process that was facilitated by One Voice for Volusia.

The **Volusia County CHNA Partnership** entities held a common vision to improve the population health and wellbeing in Volusia County. They committed to a 9-month long process of convening to review and examine county-level and sub-county-level secondary data along with supporting the collection and review of primary data in order to establish high-level and priority health issues. They agreed to invest in the creation of this shared community health needs assessment document that contains the examined and prioritized health issues along with the data indicators and identified community assets. This shared document will then serve as a common resource for both the investing partner organizations and the many community stakeholders that will support the creation of community health improvement plans based on these findings.

9. Asset Inventory

An inventory of community assets (and gaps) was developed through a two-step process.

1. A web-based survey was conducted to inventory existing assets and gaps. The survey was promoted among Volusia stakeholders through the Volusia County CHNA Leadership Team, the One Voice for Volusia network and through the Community Connector (an e-communication system in Volusia/Flagler with over 2,700 subscribers).
2. A Community Meeting was hosted by the One Voice for Volusia Coalition on April 13, 2016. The meeting was again promoted to the One Voice for Volusia network. The meeting was attended by 120 individuals representing many different community organizations. The meeting agenda included an opportunity for participants to provide input on current assets and suggested strategies to address the initial priorities through facilitated large and small group discussions.

Appendix B includes the full Asset Inventory.

10. Data Summary & Priority Selection

The Volusia CHNA Leadership Team met on March 15, 2016, to discuss twelve health issues detailed in a 140-page document sent to each member prior to the meeting. The document included a summary of the Forces of Change exercise, Local Public Health System Assessment, 2015-2016 Community Health Survey and the latest indicator data related to each health issue. Members were asked to consider each health issue through the lens of three prioritization criteria:

1. **Impact:** How much does the issue affect other issues? What is the cost of NOT addressing it?
2. **Trend & Magnitude of Difference:** Has the trend improved or worsened in the last five years? How much worse is the problem in Volusia compared to Florida?
3. **Feasibility:** Are there successful strategies to address this problem? Is there a positive cost-benefit to addressing the problem?

Utilizing a multi-voting technique, the original 12 health issues were reduced to 5 initial priority health issues listed below. In addition to the five selected issues, the Leadership Team discussed the impact of poverty on all health and wellness issues and the importance of developing strategies that either address poverty directly or appropriately addresses the health disparities created by poverty.

The validation process included a Community Input Survey and a Community Meeting hosted by One Voice for Volusia. 120 individuals participated in the community meeting. There was 80% or higher agreement with the Initial Priority Health Issues among the survey respondents and 100% agreement at the Community Meeting.

11. Key Issues to be Addressed

The Volusia CHNA Partners reconvened on June 24, 2016 for a final review of the five initial health priorities. The group consensus was to keep all five health priorities as focus areas for the Community Health Improvement Plan.

1. Adult Behavioral Health
2. Youth Mental Health and Behavioral Health
3. Chronic Disease: Cardiovascular and Diabetes
4. Barriers to Accessing Health Care Services
5. Health Eating and Physical Activity

12. Issues that will Not Be Addressed

Florida Hospital Fish Memorial will include strategies that address a component of each of the five priority issues in their Community Health Plan and will work in partnership with many other organizations that are leading strategies included in the countywide Community Health Plan.

13. Next Steps

Florida Hospital Fish Memorial will continue work on the development of their internal Community Health Plan and on the countywide Community Health Improvement Plan in collaboration with the original Partners and other community organizations.

14. Written Comments

No comments were received from the public regarding the 2013 Needs Assessment or Community Health Plan.

15. Evaluation of the Strategies Undertaken in the 2013 Community Health Plan

The Hospital conducts an annual Evaluation of the progress made on its Community Health Plan (Implementation Strategies). The Evaluation is reported to the IRS in the hospital's Form 990. The following narrative is a copy of the 2015 Community Health Plan Evaluation as noted in Form 990, Schedule H, Part V, Section B, Line 11.

Florida Hospital Fish Memorial is located in Orange City, Florida, a community of 11,000 people. Residents of the community are older than the rest of Florida; the average age is 48.3 years (vs. 41.5 for the rest of the state). Because of the large number of retirees - many in mobile home communities - the average household income is \$27,988 (vs. \$46,036 for the rest of the state).

The 2013 Community Health Needs Assessment identified heart disease/diabetes, wellness and lifestyle, and tobacco use as the top community health needs. The hospital's Community Health Needs Assessment

Committee also cited a need to update the County's 2-1-1 community resource center to include health and wellness programs.

Priority: CARDIOVASCULAR DISEASE & DIABETES

2013 Description of the Issue: The Florida Hospital Fish Memorial Community Health Needs Assessment Committee selected cardiovascular disease as a priority for the hospital and its community. The age-adjusted death rate per 100,000 for heart failure in Volusia County is more than double the rate of the state of Florida. Heart disease and stroke were also identified as leading concerns; again, the county rate is higher than state levels. Chest pain is one of the top 10 presenting symptoms in the Emergency Department. Finally, cardiovascular disease was chosen due to the existing programs and resources in place - and the potential for expansion. Discussion around cardiac disease included a "Care Team Approach" to coordinate services to eliminate systemic gaps and access issues. Ways to share information and refer patients to appropriate resources - perhaps through a provider website - will be explored.

The diabetes rate in Volusia County is just lightly above the state average, but the percentage of adults with diabetes who had two A1C (blood sugar) tests in the past year is 72.2 vs. 75.6 for the rest of the state.

2015 Update: Both heart disease and diabetes are linked to lifestyle and wellness efforts. Florida Hospital Fish Memorial partnered with the four other Florida Hospital campuses in Volusia and Flagler Counties on the Change Your Life wellness program. The Change Your Life program reached 3,100 hospital community members and employees through events, physical challenges, education, online reporting and prizes. Change Your Life centers on the eight core principles of CREATION Health (choice, rest, environment, activity, trust, interpersonal relationships, outlook and nutrition. Pre- and post-testing showed that 94.9% of program participants increased their understanding of the importance of these principles to their health and well-being.

In addition to regular cholesterol testing, the hospital provided 60 cholesterol tests for low-income residents; people with high cholesterol were referred to the local Federally Qualified Health Center, which sees uninsured patients on a sliding fee basis. Educational programming and outreach around heart disease and diabetes is noted in the Promote Health and Wellness section below.

Priority: PROMOTE HEALTH AND WELLNESS

2013 Description of the Issue: The Florida Hospital Fish Memorial Community Health Needs Assessment Committee selected Promotion of Health and Wellness as a priority, noting that preventing disease before it starts is critical to helping people live longer. The Committee cited the need to provide wellness programs and update the County's 2-1-1 system to include health and wellness resources.

2015 Update: In all, Florida Hospital Fish Memorial offered 26 health and wellness programs that drew 3,998 participants (the goal was 12 programs with 577 participants). Ongoing community lectures and education programs included Healthy Cooking, Diabetes Education, Laughter Yoga, Epilepsy, Go Red for Women, HeartCaring and a Farmers Market. Monthly support groups include Celiac Disease, Diabetes, Cancers and Overeaters Anonymous.

At the time of the 2013 Assessment, the County's 2-1-1 community resource line was sorely out-of-date. The hospital worked with community partners to update the 2-1-1 service. The 2015 goals and achievements were threefold: 1) increase the number of health and wellness resources listed in the county's 2-1-1 database from 0 (actual was 139); 2) increase referrals by staff to health and wellness resources (actual was 1,152); and 3) increase the number of web referrals for health and wellness resources from 0 (actual was 2,360).

Priority: TOBACCO USE

2013 Description of the Issue: Tobacco use affects all ages, starting at middle school age. Our Needs Assessment showed a higher percentage of adult smokers in Volusia County than the state of Florida (23% versus 17%). Respiratory issues (including bronchitis) are one of the top 10 presenting conditions in the Emergency Department at Florida Hospital Fish Memorial.

2015 Update: Florida Hospital Fish Memorial provides smoking cessation classes (with scholarships for low-income participants). The hospital is working with partners, such as Family Health Source (i.e. federally qualified health center), the Volusia County Health Department and area employers to incorporate tobacco cessation efforts into the work place. The hospital is also working with community partners on Youth Substance Abuse Prevention efforts

Priorities Considered but Not Chosen

Access to Care: Florida Hospital Fish Memorial did not choose access to care as a top priority, but recognizes that the community's lower-than-state-average incomes means that access to affordable health care is important to this community. Florida Hospital Fish Memorial provides financial support to the Good Samaritan Health Clinic in nearby DeLand; the Clinic provides primary medical and dental care to the underserved population.

The hospital was instrumental in bringing the Community Medical Center of West Volusia to Orange City. The hospital works with the Center - a federally qualified rural health center - to serve many minority, low-income and disabled people. The hospital works with the West Volusia Hospital Authority (taxing district) to advocate for funding for the Center and other safety net programs.

Other existing interventions include free screening mammograms, diagnostic mammograms, breast ultrasounds, breast MRIs and image-guided biopsies for uninsured women. Hospital social workers and a cancer navigator who work with uninsured cancer patients to connect them with resources and supportive information. The hospitals partners with the Volusia County Health Department to provide care management and coordination for underserved/uninsured patients who present in the Emergency Department

Cancer: Cancer was not selected as a priority because Florida Hospital Fish Memorial already addresses this through our Cancer program. The Fish Memorial campus has focused its effort on breast, skin, GI and lung cancers. We will be identifying potential community partners when addressing future prevention and screening/early treatment options.

Existing interventions include:

“Change Your Life” wellness program for 3,100 hospital employees and community members (including scholarships for low-income people) centered on the eight core principles of CREATION Health (choice, rest, environment, activity, trust, interpersonal relationships, outlook and nutrition): events, physical challenges, education, online reporting and prizes.

Provide community lectures, screenings and support groups

- Breast Cancer
- Cancer
- Men's Cancer
- Breast Cancer
- Leukemia/Lymphoma/Myeloma
- Look Good, Feel Better (for women with cancer)

Behavioral Health: Florida Hospital Fish Memorial does not provide behavioral health services. While behavioral health was not selected as a priority, tobacco use and substance abuse issues are being addressed through educational programs targeting underserved youth in the community.

Appendix A: Community Health Survey 2015-2016

Methodology

The 2015-2016 Community Health Survey in Volusia and Flagler Counties relied primarily on an Internet based survey (utilizing Survey Monkey) to reach as many respondents as possible within the limits of the project budget. The online survey was available in English and Spanish via www.communityhealthsurvey.com. There were 2,150 Internet surveys collected. Paper surveys, also available in Spanish and English, were utilized to reach individuals without convenient access to the Internet and were manually entered. 530 paper surveys were manually entered.

The online and paper surveys were promoted and distributed through email communication, postings on various websites, and paper surveys made available at partner's places of business. Partners included:

- The nonprofit, governmental and business partners involved in the Community Health Needs Assessment process
- The members and partner organizations of One Voice for Volusia
- The Community Connector, an e-blast system with over 2,900 subscribers.

The 21-questions survey, based on an instrument used nationally, included questions regarding perceived quality of life and health of the community, health concerns, barriers to health care, use of health care, health care needs and demographic information.

A total of 2,680 individuals completed the Volusia/Flagler Community Health Survey (online or via paper surveys). Five individuals completed the survey online in Spanish (no Spanish paper surveys were completed). The survey respondents were asked "*Where is your permanent residence?*"

- 2,003 reported that they lived in Volusia county
- 584 reported that they lived in Flagler county
- 81 reported that they lived in another Florida county
- 12 reported that they lived outside of Florida
- **1,447 individuals reported that they lived in the MMC/Oceanside PSA (by zip codes)**

Limitations

Convenience Sampling

A convenience sampling methodology was used for the 2015-2016 Community Health Survey. The convenience sampling process is a non-probability sampling technique that relies on the collection of data from populations within easy reach of the researcher. In this case, community agencies were asked to promote the survey with their customers, staff and other stakeholders. This method was selected for ease and budget restrictions. Convenience sampling is much different from a random sampling methodology where the survey population is randomly sampled to gain responses from every population subset.

Limitations and Cautions with Convenience Sampling

Convenience sampling can lead to the under-representation or over-representation of particular groups within the sample. This was the case with the 2015-2016 Community Health Survey for several subsets of the Volusia County population including males and individuals age 18-24. It is important to understand that convenience samples do not produce representative results because of the inherent biases. The results presented here cannot be considered representative of the entire population.

Limitations of Internet Surveys

Although paper surveys were made available, the survey process relied primarily on the Internet survey. Households without access to the Internet and Internet survey results tend to underrepresent lower-income, less educated and minority households.

Community Survey Instrument

Creating a Healthier Volusia and Flagler: 2015 Community Survey

We need your help in better understanding Volusia's and Flagler's health from a resident's perspective. Please fill out this survey to share your opinions about health and your quality of life in your community. Your survey results will be used to inform planning initiatives as they relate to health. For more information or a copy of the final report, please contact Julie Barrow at 386-947-8301. Thank you!

1. Where is your permanent residence?

- Flagler Volusia Another Florida County Outside of Florida

2. Zip code of where you live: _____

3. How do you rate your overall health? (Check **ONE selection)**

- Excellent Good Fair Poor Don't know

Thank you for taking the time to complete this survey!

Appendix B: Full Asset Inventory

Efforts that are successfully addressing ADULT BEHAVIORAL HEALTH in Volusia County (Include specific resources, grants, groups, programs and services, organizations, efforts to impact policies/laws, system improvement efforts, collaborative groups, other strategic plans etc.)

- Break the Cycle Outpatient Program 724 S. Beach St. Daytona Beach, Fl. 32114
- The Chiles Academy
- SMA walk-in is great resource kind of like urgent care for BH
- Stewart Marchman Act Behavioral Healthcare
 - Adult Outpatient Substance Abuse Program (AOP)
 - Physician Services Medication Outpatient Program
 - Florida Assertive Community Treatment (FACT) Program
 - Anti-Drug Initiative (ADI)
 - Forensic Comprehensive Community Support Team (FCCST)
 - Family Intervention Services (FIS)
 - Family Intensive Treatment Team (FITT)
 - Community/Court Liaison (Outreach) Services
 - SMA Treatment Team at the Volusia County Corrections Department
 - Pharmacy
 - Enrichment Program Industries for persons with dev. disabilities or co-occurring disorders
 - 24-hour Crisis Stabilization and Detox Services and Screenings
 - Reality House, Re-Entry and Work Release Programs
 - Family Education Programs, Speakers Bureau and Mental Health 1st Aid
- Treatment availability
- Substance Abuse Task Force
- Halifax Urban Ministries
- Daryl Strawberry Recovery Center
- ER's treat those wanting to hurt themselves or someone else.
- Access to information on assistance available
- Volusia-Flagler Behavioral Consortium and Circuit 7 Behavioral Consortium
- Narcotics Anonymous has almost 100 meetings in the area <http://www.na.org/MeetingSearch/>
- AA Meeting Locations
- Healthy Start Coalition of Volusia and Flagler Counties
- Affordable medical mental health care to include alternative treatments beyond hospitalization
- One Voice for Volusia
- Halifax
- The Community Connector
- Faith based counseling centers and private counseling opportunities
- Volusia County Moms
- Salvation Army
- Career Resource Center
- NAMI
- LSF (Lutheran Services of Florida)
- Transition Team Meetings

What more could/should be done to successfully address ADULT BEHAVIORAL HEALTH in Volusia County?

- Open a detoxification / crisis unit.
- Enhanced screening opportunities
- Free transportation
- More options for low-cost or free therapy services.
- No help for some who accessed BH via SMA walk-in and needs meds to bridge the time it takes for the long-term meds to kick in. This person could be in mental hell for 3 or more weeks. By that time, they may want to hurt themselves.
- Collaborate efforts for the common good of the community
- Fire Service is beginning behavioral health programs around the country as they are usually the first to contact a potential patient
- More Drop-In Centers (we might have 2?)
- De-stigmatization
- Sharing of information between and among agencies
- More intensive outpatient options.
- Treat each case/individual separately as they have different needs
- Need a central receiving facility
- increased in- and out-patient treatment facilities
- One stop centrally located satellite site serving this population
- Don't use the "one size fits all" for this issue - there are too many factors to consider for each individual
- Crisis Stabilization Funding tied to Intensive In-Home therapy services once stabilized
- Co-occurring counseling services
- Decreased planning studies, more active intervention
- Mobile crisis teams

Efforts that are successfully addressing YOUTH MENTAL HEALTH in Volusia County (Include specific resources, grants, groups, programs and services, organizations, efforts to impact policies/laws, system improvement efforts, collaborative groups, other strategic plans etc.)

- The Chiles Academy and MicroSociety
- SMA; CINS/FINS, BEACH House and Residential Adolescent Program and ADOP
- Behavioral Screening Tools now on Volusia County Schools' report cards and Problem Solving Teams and The Volusia County Behavioral Initiative (VCBI)
- Life Coach Barbie Reed
- One Voice for Volusia Youth Substance Abuse Prevention Programs and NOPE Task Force
- Circuit Seven System of Care - Evelyn Lynam
- Children's Home Society, Devereux, SMA, Halifax Behavioral, Circle of Friends, House Next Door
- Circuit Seven Early Childhood Court Team
- HBS Halifax Behavior Services
- Healthy Start Family Place and Healthy Families
- Community Partnership for Children/Community Based Care
- Pediatricians
- ADAPT Behavioral Services
- Programs offered through Domestic Abuse Council
- Cafe' Dialogues and Healthy Start Initiatives

- E.S.P Case management
- Florida United Methodist Children's Home
- PACE Center for Girls, Inc.
- Help Me Grow/211 screening tools and referrals
- School Health Advisory Committee (SHAC)
- Big Bear Behavioral Health, Inc., Presbyterian Counseling Center, Port Orange Counseling Center, Durden Consulting, Impower
- Grief Related: GriefShare, Begin Again, Hospice, Tears Foundation, Hospital Support Groups, etc.
<http://www.volusia.com/local-support-groups/>
- Volusia Department of Juvenile Justice Council
- Prevention: Boys and Girls Clubs, Mentoring Programs, Youth Sports Leagues/Programs, PAL, After School Programs, Arts programs, Recreation Departments, Clubs, Youth Groups

What more could/should be done to successfully address YOUTH MENTAL HEALTH in Volusia County?

- Expand in- and out-patient treatment facilities
- Increase prevention
- Earlier diagnosis.
- Getting adults involved in youth programs to keep kids growing
- Increased and easy access to information for services
- A Central Receiving Facility
- Expand screening opportunities
- Coordination of services
- Availability of therapy in schools.
- Education for parents, grandparents and extended family members
- Social Norming and Stigma Reduction regarding Mental Health and increasing youth protective factors
- Campaign to rid the stigma of Mental Health diseases
- Promoting youth service organizations
- Trauma Screening by pediatricians and other first contact professionals
- Tying treatment funding for youth mental health when parent's behavioral health is compromised

Capacity Issues and Identified Gaps in services identified by the Volusia/Flagler Behavioral Consortium

- Children's Community Action Team (Behavioral Health Consortium Priority Top Priority)
- Intensive Crises Counseling Program/Intensive In-Home Family Services (Behavioral Health Consortium Top Priority)
- Family Services Planning Team funded/redefined for our area (Behavioral Health Consortium Top Priority)
- Transitional Youth Services linked to FSPT and other services (Behavioral Health Consortium Top Priority)
- Primary Prevention Services for children funding (Behavioral Health Consortium Top Priority)
- Uniform referral process and form
- Resource Guide
- Targeted Case Management (TCM)
- Psychiatric Evaluation and services
- Psychiatric Medication Management
- Therapeutic Group Homes
- Residential Statewide Inpatient Psychiatric Beds- SIPP (regional issue)

- Respite Beds (6 added to SMA through LSF in April 2016)
- Autism Spectrum Disorders (ASD) Services
- Mobile Crisis Team
- Specialized Respite for CSEC (children who have been sexually exploited) Victims
- Transportation to PHP Program
- Promotion of Universal Awareness of Mental Health Issues/identified youth sooner through screenings

Efforts that are successfully addressing CHRONIC DISEASE-CARDIOVASCULAR DISEASES & DIABETES in Volusia County (Include specific resources, grants, groups, programs and services, organizations, efforts to impact policies/laws, system improvement efforts, collaborative groups, other strategic plans etc.)

- Midtown Eco-Village and The Kale Cafe
- Volusia County Schools Wellness Program
- Local hospitals
- YMCA Programs - Health and Wellness that includes Diabetes Prevention Program and Nutrition programs
- Local schools
- Florida Hospital - Creation Health, Smoking Cessation, Seminars, Workshops, Educational Campaigns
- Seminars and education programs offered by the hospitals and health departments
- Popularity and ease of use of fitness and health tracking "apps"
- Healthy Volusia and Partnerships with the Florida Department of Health
- Worksite Wellness
- Northeast Florida AHEC (Diabetes and Smoking Cessation)
- Mayor's Health Challenges across Volusia

What more could/should be done to successfully address CHRONIC DISEASE-CARDIOVASCULAR DISEASES & DIABETES in Volusia County?

- Collective impact effort on exercise, healthy food options, and regular screenings
- Continuing to address the problem and educate the population
- Increase Educational Opportunities
- Lower cost insulin resources
- Access to more affordable fresh fruits and vegetables
- Through Fire Department Community Paramedicine, agencies can visit the most frequently seen diabetics to reduce their occurrence of crisis.
- FD can also evaluate food situation at home and offer information to maintain a healthy diet
- Work place policies and insurance premium fees applied for life-style choices that lead to chronic disease
- Healthy living programs to get and keep kids moving
- More diabetes education

Efforts that are successfully addressing ACCESS TO HEALTH CARE SERVICES in Volusia County (Include specific resources, grants, groups, programs and services, organizations, efforts to impact policies/laws, system improvement efforts, collaborative groups, other strategic plans etc.)

- Jesus Clinic and Volusia Volunteers in Medicine
- Two Family Care Coordinators at The Chiles Academy and Early Head Start
- Good Samaritan Clinic
- Healthy Start Family Place
- Walk in Clinics for quick care - new FH CentraCares
- Health Navigators to help with insurance coverage access
- Local Health Department
- Healthy Families
- Halifax Community Clinics
- Florida Shots
- 211live.org
- Star Center
- COA services for Seniors and multiple hospices for palliative care
- HUM and Salvation Army and Halifax Hospital and other partners providing Healthcare to the homeless
- Doctors' offices now open on Saturdays
- Halifax Health Behavioral-Support groups open to the public
- Florida Breast and Cervical Cancer Prevention/Early Detection Program
- Halifax Oncology Center "ROC"
- Project Warm
- One Voice for Volusia (OVFV)

What more could/should be done to successfully address ACCESS TO HEALTH CARE SERVICES in Volusia County?

- Mobile services for screenings in collaboration with community centers, churches, schools, etc. in more rural parts of county
- Transportation
- Better public transportation between the west side and east side. Takes too long to go across county. Could be 2 plus hours one way. Maybe hospitals provide community benefit by funding more Votran Gold type transportation.
- The west side of the county needs more specialists and quick-care.
- Extended hours for service and weekend hours without having to go to an Urgent Care or Hospital which is more expensive
- Find providers able to alter hours to accommodate the working poor, e.g. after 8-5 hours and weekends
- Fire Department Community Paramedicine - assist patients with access to medications, understanding discharge orders, and accessing available social services
- Update 211live.org with more resources and show office hours under listing
- Satellite locations for WIC and child health care
- Doctors need to be free to practice medicine without the approval of the insurance companies.
- Study why people go to emergency departments, if it's convenience, what is inconvenient about non-ER providers?

Efforts that are successfully addressing HEALTHY EATING & PHYSICAL ACTIVITY in Volusia County (Include specific resources, grants, groups, programs and services, organizations, efforts to impact policies/laws, system improvement efforts, collaborative groups, other strategic plans etc.)

- 5210, YMCA's programs and Fitness Programs and Gyms in the community
- Boys and Girls clubs
- Sports leagues
- Bikes and Trails
- Midtown EcoVillage, The Kale Cafe
- The Chiles Academy and Early Head Start's nutrition program
- Local churches
- Volusia County moms
- Girls on the run
- Alliance for Healthier Generation
- Volusia County Schools- VCS Wellness Policy
- SHAC – School Health Advisory
- Action for Healthy Kids
- Healthy Volusia
- Team Red White and Blue
- County and City Recreation Departments
- Mayor's Fitness Challenges
- Worksite Wellness - <http://www.funcoastwwc.org/>

What more could/should be done to successfully address HEALTHY EATING & PHYSICAL ACTIVITY in Volusia County?

- Encourage people to try new activities, perhaps through scholarships
- Encourage entrepreneurship in starting farmer's markets
- Walkability enhancements (sidewalks, etc.)
- Fitness challenges
- Offer local tax credits for coaching, teaching, participating in exercise activities
- Address food desert issues
- Coordinated after school activities
- Apply for grant opportunities to promote healthy eating & physical activity
- Set Goals for nutritional education
- Coordinate efforts and programs that exist in the community & district
- Cross county trail/bike path that is accessible
- Outreach to adults that DO NOT have children.
- Fit-bit "type" challenges on a county wide scale. May also be options for smart phones.
- Healthy diet is a direct link to various medical issues. Community Paramedicine interacts with patients with known issues in a one-on-one basis at their home
- Policy changes and incentives/fines for health living (healthy BMI should carry same weight as non-smoker)

**One Voice for Volusia Coalition CHNA Vetting Attendance
