Rooted in Faith. Forward in Care.

Our principles for caring for the whole person started more than 150 years ago with the founders of the Seventh-day Adventist Church. We continue to help the people in our care create a life of whole health by healing their bodies, strengthening their minds, and lifting their spirits. Today, AdventHealth is one of the largest health care providers in the United States, with thousands of compassionate professionals working to Extend the Healing Ministry of Christ around the country.

Our Mission:

Extending the Healing Ministry of Christ

Our faith-based mission is the foundation for everything we do. We believe health should be measured in terms of the whole person — body, mind, and spirit. And it's our promise to you to help you feel whole. With world-class expertise and uncommon compassion, we're here for you through every phase of life.

AdventHealth History:

AdventHealth was formally founded in 1973, but traces its roots back to 1866 with a team of Seventh-day Adventist medical pioneers in Battle Creek, Michigan. During a time when many treatments were as harmful as the conditions they attempted to cure, our founders were considered revolutionaries for their belief that preventing disease was as important as treating it. They believed the best care didn't treat only the body, it also helped heal the mind and lift the spirit.

Since our founding, we've treated every patient as a creation of God, deserving of extraordinary whole-person care. By focusing on the whole-person and strengthening our mission, AdventHealth is a national leader in quality, safety, and patient satisfaction. Our founders' commitment and philosophy continue today in hundreds of hospitals, nursing homes, and clinics around the world.

Words to Heal by: AdventHealth Values

Quality and Service Excellence

We consistently deliver exceptional whole-person care and strive for excellence in all we do.

Community Well-Being

We are committed to improving the health, prosperity, and well-being of the communities we serve.

High Ethical Standards

We are called to uphold the highest standards, with integrity driving every decision we make and every action we take.

Stewardship

We are guided by relentless stewardship in the management of the resources entrusted to us.

Inclusiveness

We celebrate the diverse backgrounds, cultures, and experiences of our patients, visitors, and colleagues, and embrace opportunities to learn and grow from new perspectives.

Direct Admit Criteria

ED Criteria:

If the patient has any of the following, please send to the Emergency Department immediately:

1. Chest pain, abnormal EKG, atrial fibrillation with rapid ventricular response, shortness of air with O2 sat below 89%, acute abdomen, stroke symptoms, acute mental status changes, Na <120, K>6.0 or <2.5, positive D-dimer (may discuss with hospitalist).

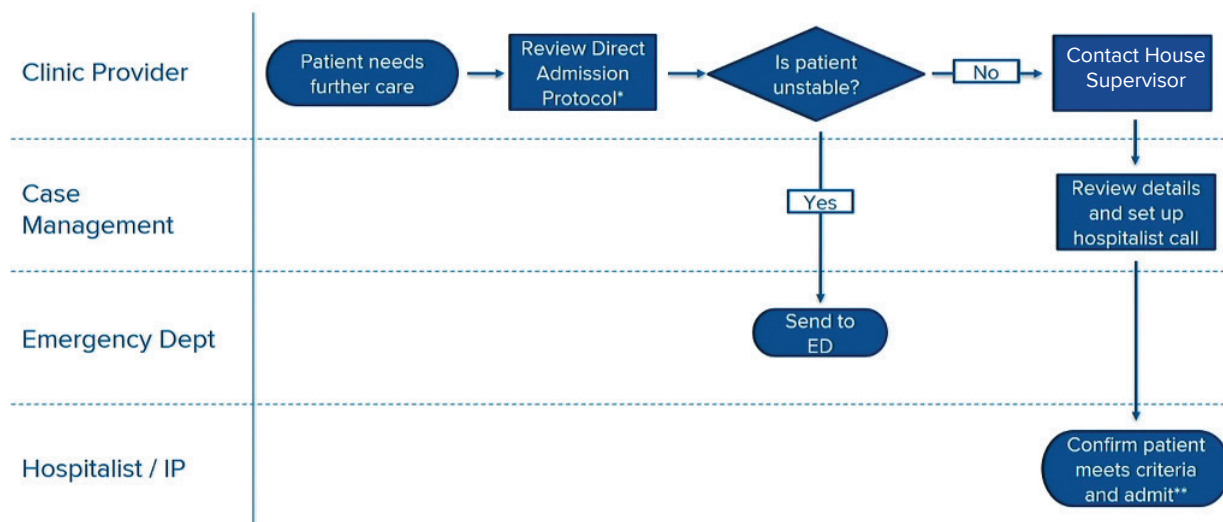

2. Meets sepsis criteria:

- a. Any 2 or more:
 - Temp < 96.8 or >101 F
 - HR>90
 - RR>20
 - WBC > 12k, <4k or >10% bands
- b. And evidence of at least one new organ dysfunction:
 - SBP <90
 - Creat >2.0
 - Bilirubin >2
 - Platelets <100,000
 - INR > 1.5
 - Lactate >2mmol/L

- Community acquired pneumonia failing outpatient treatment without sepsis or hypoxia
- Skin and soft tissue infections failing outpatient treatment (ex. Cellulitis, diabetic foot ulcers, etc)
- Acute Exacerbation of COPD or Asthma failing outpatient treatment without hypoxia
- Bronchitis
- Dehydration requiring IV fluids
- Syncope with no focal neurologic deficits
- Afib
- Uncontrolled diabetes mellitus requiring high doses of insulin who failed outpatient treatment
- Lower gastrointestinal bleed with Hgb greater than 7.5 and hemodynamically stable
- Anemia HCT<25
- CHF exacerbation failing outpatient treatment with no acute EKG changes
- Gastroenteritis
- Pyelonephritis

*If the patient meets above criteria for admission, please call House Supervisor at 606-598-1075. A phone conference with the hospitalist provider will be arranged to discuss the patient. If accepted, instructions will be provided for direct admission. All patients must be evaluated by PCP or provider on the day of admission.

Women's Care

Blue Angels Program - High-Risk Obstetric Care to Rural Kentucky

Highly trained obstetricians use special equipment to review fetal ultrasounds remotely, in real time, and talk with the patient simultaneously.

Ultrasound techs travel with a portable video conference device, seeing patients whose hometown obstetricians have identified as high-risk based on their own ultrasound technology.

The briefcase-size video system, which includes a camera and microphone, connects to the ultrasound equipment in each location and allows the obstetrician to see the ultrasound as it is being performed, guide the technician through difficult studies, and communicate with the patient just as if they were in the same room.

This program is conducted through our Women's Care service line. For more information call 606-599-4080.

Wound Care

Services offered:

- Compression therapy
- Limb salvage
- Offloading
- Specialty dressing and wraps
- Surgical debridement (in-clinic)
- Staple and stitches removal
