

Clinical Brief #23 | COVID-19

Developed Wednesday, April 29, 2020

INFORMATION FOR ALL CLINICIANS

Clinical leaders are providing frequent updates to all clinicians in an effort to keep you current about AdventHealth's response to COVID-19. The following topics are included in this brief:

- Safe Reopening - Patient Visitation Plan
- Asymptomatic Patient Surveillance

5:00 pm April 29 COVID-19 Situation Report

*Based on COVID-19 Power BI Dashboard data

COVID-19	CFD	WFD	MSD
Total Confirmed	1,519	165	346
Currently Inpatient	76	27	28
Total Negative Tests	26,909	3,405	4,277
Current PUI	1,120	92	31

Safe Reopening - Patient Visitation Plan

The COVID-19 visitation policy has been updated to change visitor restrictions in the following ways:

- Each patient may have one visitor per day. The visitors will continue to be screened upon entry into the facility.
- The visitation policy includes patients with known or suspected COVID-19.
- The visitation policy includes COVID-19 cohort units.

Asymptomatic Patient Surveillance

As AdventHealth facilities contemplate a Safe Reopen Plan dependent upon local facility factors, orderables are now available for asymptomatic patients who are being admitted to the hospital for reasons other than COVID-19 or influenza-like illness. The **Coronavirus 2019 PCR Asymptomatic Patient** orderable is pre-checked in PowerPlans and will not trigger "PUI" at the time of the test order but will trigger isolation rules if the result is reported as positive and will flag "positive" on the Banner Bar. The asymptomatic patient test should not be used for symptomatic patients.

Symptomatic patients should be tested with the **Coronavirus 2019 PCR** orderable, which will show as "PUI" on the Banner Bar at the time the order is placed. [This educational flyer](#) describes this Banner Bar logic.
