

Clinical Brief #33 | COVID-19

Developed Thursday, July 2, 2020

INFORMATION FOR ALL CLINICIANS

Clinical leaders are providing frequent updates to all clinicians in an effort to keep you current about AdventHealth's response to COVID-19. The following topic is included in this brief:

Asymptomatic Team Member or Health Care Provider Exposure

Asymptomatic team members or health care providers who have had a high-risk exposure are recommended to work remotely for seven days and self-monitor for symptoms. [This HR resource](#) provides recommendations as well as steps to take if there is suspicion of COVID-19.

High-risk is defined as:

1. HCPs who live with someone who is COVID-19-positive
2. HCP who had prolonged close contact with an infectious patient, visitor or fellow HCP with confirmed COVID-19 ("Prolonged" means more than 15 min; "close" means less than 6 feet; "infectious" means symptomatic or within 48 hours of symptoms onset)
AND
 - a. The COVID-19-positive person was wearing a mask and HCP was not wearing a mask **OR**
 - b. The COVID-19-positive person was not wearing a mask and HCP was not wearing a mask and eye protection
3. HCPs who are present in the room and had any duration of contact with a patient who is confirmed COVID-19-positive while performing a high-risk aerosol generating procedure
AND
 - a. HCP was not wearing all recommended PPE (i.e., gown, gloves, eye protection, respirator)

Please reference [this flowchart](#) for help in discerning one's exposure risk.
